EDUCATION

Dr. D. Y. Patil Vidyapeeth

B.Tech in Artificial Intelligence and Data Science

Pune, Maharashtra, India

November 2021 – May 2025

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks & Libraries: Angular, TensorFlow, Scikit-learn, Pandas, NumPy, Flask

Tools & Technologies: Git, AWS, MySQL, MongoDB

AI/ML Expertise: Machine Learning, Deep Learning, Natural Language Processing, Data Analysis

Soft Skills: Problem-Solving, Business Development, Communication, Cross-functional Collaboration, Analytical Reasoning

PROFESSIONAL EXPERIENCE

Tech Surya IT Solution

Jul 2024 – Aug 2024

AI & Machine Learning Intern

- Applied ML concepts including preprocessing, feature engineering, and model training.
- Worked on real-world datasets to derive insights and build predictive models

My Captain

Feb 2022 – Mar 2022

Business Development Associate

- Conducted market analysis and supported strategic decision-making
- Delivered presentations and contributed to customer engagement initiatives

PROJECTS

AI Candidate Screening System |

2026

- Designing a full-stack AI-powered platform for automated resume screening using NLP techniques & ML models.
- Creating RESTful services with FastAPI to support real-time candidate assessment.
- Integrating semantic similarity via vector embeddings and similarity scoring to match candidates with roles.

Streamlining Healthcare |

2026

- Developed a full-stack web application using Flask that enables users to predict the likelihood of 7 major diseases using Machine Learning and Deep Learning models.
- Deployed on Heroku with a user-friendly interface for both tabular data input and medical image upload.

AI-OBJECT-DETECTION |

2025

- Developed a real-time object detection pipeline with TensorFlow.
- Added bounding box generation, confidence score calculation, and real-time tracking for detected objects.
- Optimized the detection workflow to maintain live performance while preserving accuracy.

CERTIFICATIONS & ACHIEVEMENTS

AWS APAC - Solutions Architecture Job Simulation: Completed a practical cloud architecture simulation showcasing familiarity with AWS services and solution design.

Academic Excellence: Sustained strong academic performance across the B.Tech program with an emphasis on AI and ML-focused subjects.

Technical Leadership: Directed multiple academic projects, demonstrating ownership of deliverables, timeline management, and successful project execution.
